

SIZE GUIDE

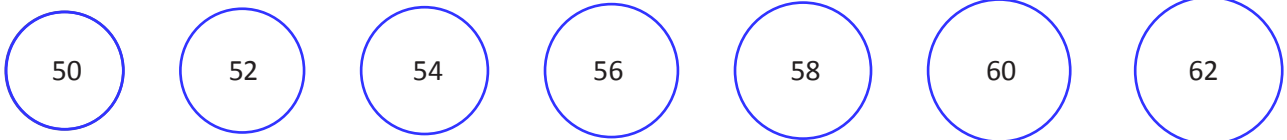

Unsure about your ring size? No problem.
Follow the following steps.

1. Print this page without scaling and check the scale using a ruler.
The line here on the right has to be 2cm including the 2 vertical lines.

2. Grab a ring that fits the finger where you plan to wear your new Juuls ring.
3. Place it on the circles below. The diameter of the circle should match the interior diameter of your ring.
The blue line needs to be visible when you place your ring on the paper. This will help you determine the right size to choose.

If your ring is between two sizes,
it is better to take a bigger size.

Juuls is not responsible for any mismeasurement. If you are in doubt you can always pass by a goldsmith or jewelry store in your neighbourhood, this will give you the best result. Contact us if you have any questions.
